Bridging the "Business-Society" Divide

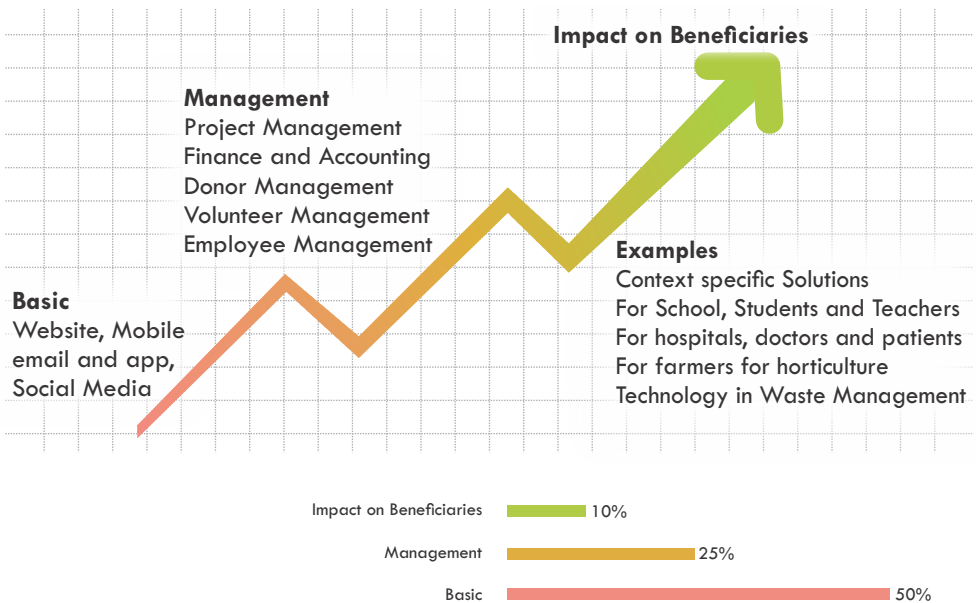

SocialTech

Your Extended Technology Team

Value Chain for Technology Adaption in Social Sector

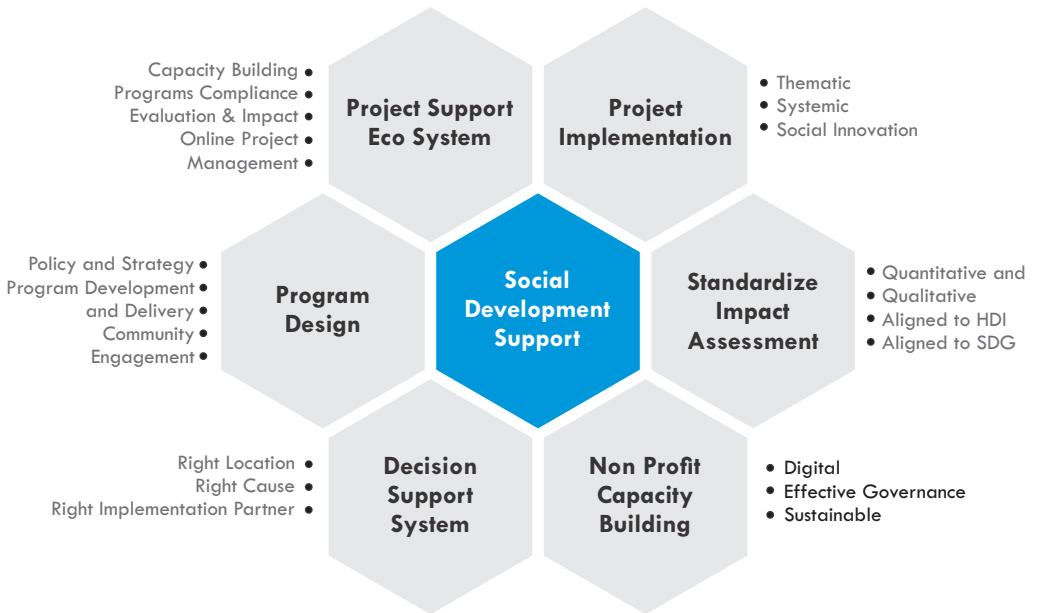

Our research indicates that the technology adaption in social development sector is happening at 3 levels as detailed in illustration.

The technology adaption at Basic level is more but the sector is progressing well in Management and for creating impact on beneficiaries.

Technology in Social Sector is catching-up.

Social Development Ecosystem

Social Development Sector needs a strong support ecosystem to create the desired scale of social impact.

SocialTech is our attempt to leverage technology in all the possible areas.

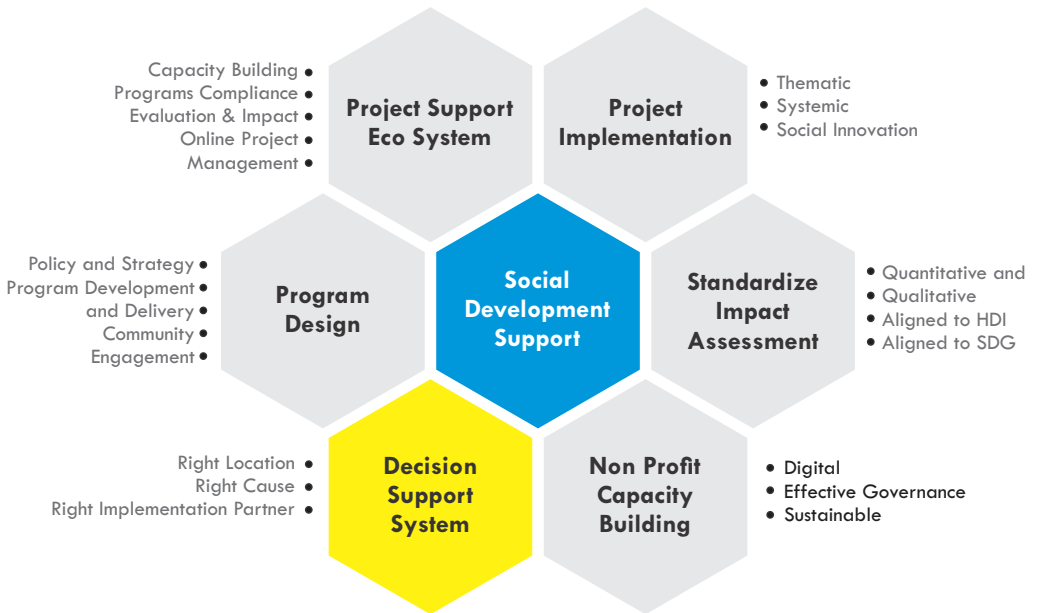

Digital Capability Building

At the moment, we are working with 55 Non-profit organizations all over India for Digital Capability building initiatives in following areas :

- Functional Website
- Online Fund Raising
- App for project awareness and Donations
- Digital Marketing to access funds globally

Funding Decision Support

This is a HDI based system to strengthen the choice of location, cause and implementation partner for funding decision of the CSR program. The system helps in setting the right context for need-based assessment and baseline survey.

CSR Lifecycle Management

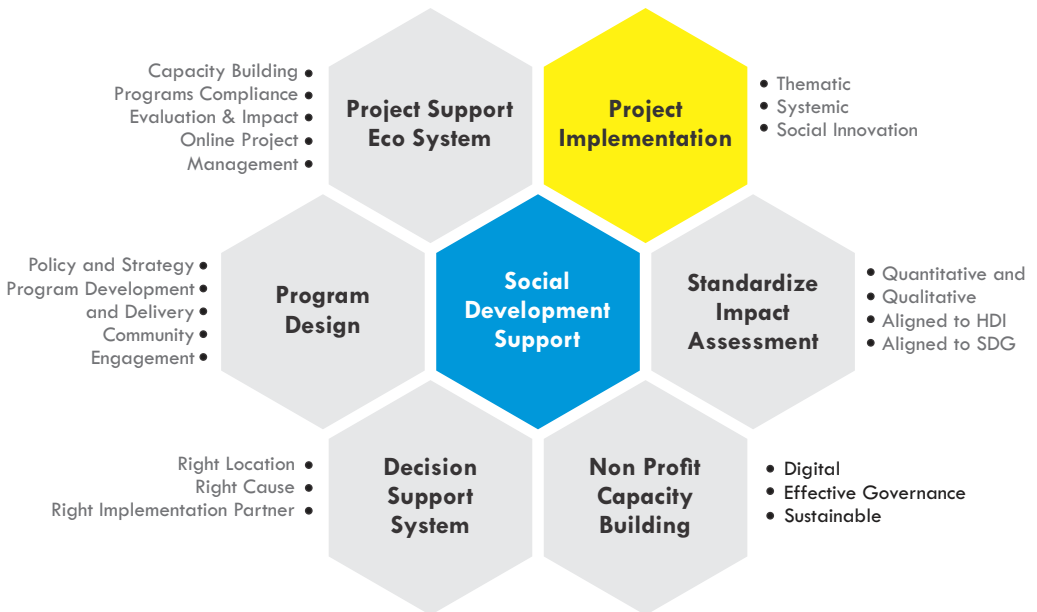

We have end-to-end CSR project management System available in SaaS model on a cloud with following main modules which can be configured and customized to make it suitable for any thematic area as well as for any size of the project

- Project Planning and Tracking
- Governance
- Reports and Dashboards
- Budget Management
- Beneficiary Tracking
- Quantitative Impact Assessment
- Volunteer Management
- User Management

Support for BIS- IS 26001 : 2020 CSR star rating

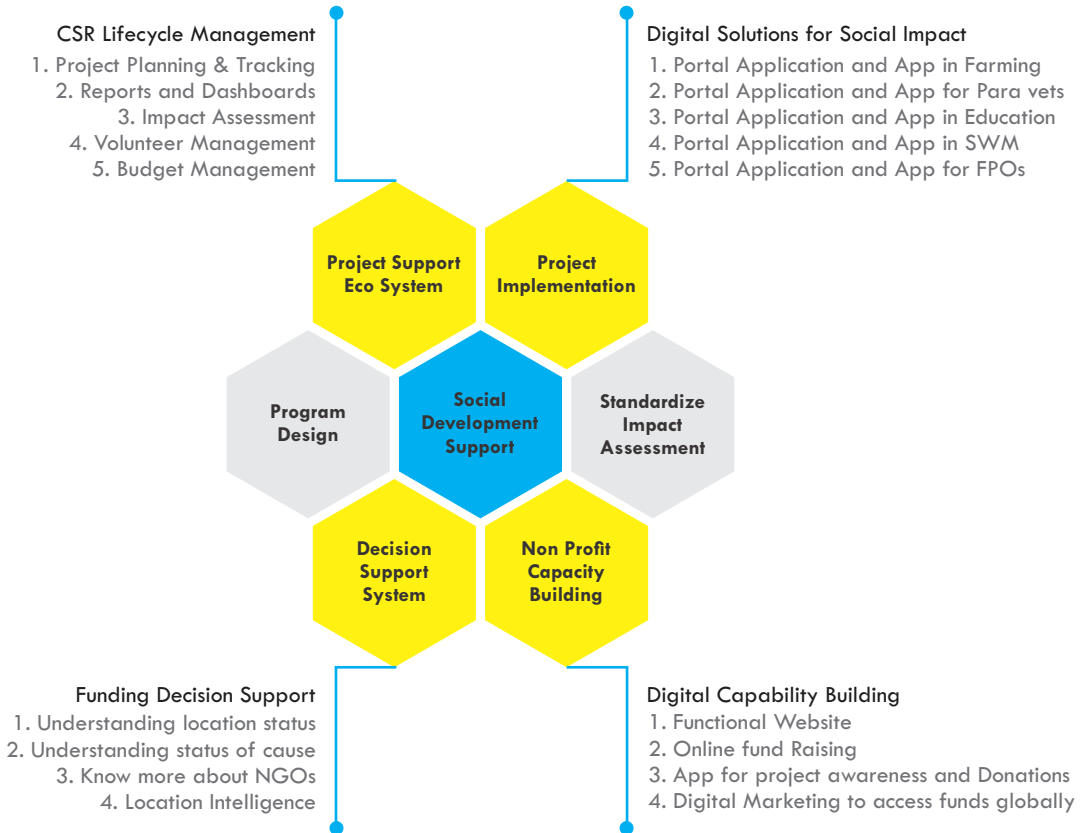

Digital Solutions for Social Impact

At the moment, we are working with Non-profit organizations all over India for Digital Solutions to create impact on beneficiaries in following few sample areas

- Portal Application and App in Farming
- Portal Application and App for Para vets
- Portal Application and App in Education
- Portal Application and App in SWM
- Portal Application and App for FPOs

Leveraging Technology in Social Development

We offer our services as extended technology team to corporate, foundations and NGOs to develop context specific solutions at optimal cost with an clear understanding of creating a social impact as an end result

Case Study : 1

Establishing a technical partnership to support architecture, design, development and maintenance of software applications as needed for the following projects.

1. High Impact Intervention
2. Education
3. Farmer Producer Organization (FPO)

We are delighted to witness our technology solutions creating an inspiring impact on the life of farmers in rural parts of south India by identifying the right intervention in farming.

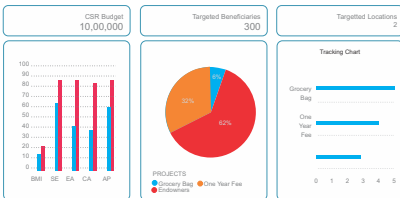

Farmer using Azola intervention for better yield of paddy and saving water at the same time

Case Study : 2

Establishing a technical partnership for architecture, design, development and maintenance of online fund raising and micro CSR platform.

we are also excited to see that one of the schools leveraging our technical solution to connect the alumni spread across the world coming together and bringing smiles to rural, backward and economically challenged students by way of sponsoring their education.

Vijaya studing in 6th class benefitted from Grocery bag scheme...

Testimonials

Dr. Mohan
Founder NMGCT
